

STRATEGIC RESOURCES “The Future of Metal Mining”

So far...

In July 2017, the POCTEP ESMIMET project started. This month was the launching of the project, which was held on the 12th at the premises of its coordinator, the CARTIF Foundation.

During these first months the characterization of the known deposits and also an inventory of mineralizations in the field of development of the work is being carried out.

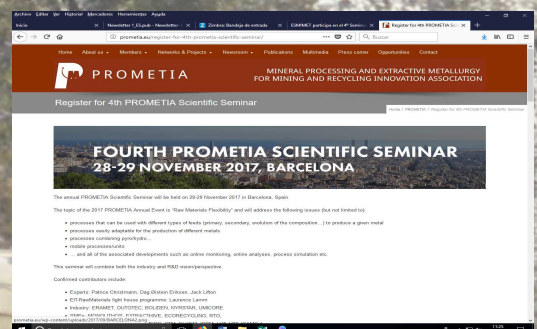

Coming soon...

Next October, Sevilla will receive the representatives of the POCTEP ESMIMET project that will present the poster project on 18 and 19 at the II International Exhibition of Metal Mining.

The POCTEP ESMIMET project will also be presented next November at the 4th Scientific Seminar organized by the Mining, Mineral Processing and Extractive Metallurgy Association (PROMETIA).

In the coming months the characterization and inventory of known deposits and existing mineralizations will be completed.
