Until now....

The POCTEP ESMIMET project was presented by means of a poster on 17, 18 and 19 October 2017 at the Palace of Congresses and Fairs of Seville (FIBES), which hosted the II International Exhibition of Metal Mining, a benchmark meeting point for the mining sector metallurgical internationally.

The Pedro Nunes Institute, partner of the project, hosted the follow-up meeting of the ESMIMET project in its facilities in Coimbra, the partners shared the progress made so far and marked the steps to follow for the following actions.

The CARTIF researchers who are part of the ESMIMET project team participated on November 28 and 29 in the fourth scientific seminar organized by the Association of Mining, Mineral Processing and Extractive Metallurgy (PROMETIA).

The company CONSULNIMA and the researchers of the ESMIMET project of CARTIF, meet to design a collaboration action between the consultant of integral management of the environment and the project. This collaboration is based on the development of R + D + i activities related to environmental and energy techniques.

The ESMIMET project participated in the conference organized by the Institute for Business Competitiveness (ICE), under the framework of the REMIX project, which has worked for the past two years to bring together European regions that have mines in operation to facilitate access to Innovation and sustainability of the mining sector.

Coming son....

Continuation of the characterization and sampling of known deposits.

The project will continue with its communication actions, at the beginning of 2018.
