June 2018

Until now....

During these months the inventory of existing mineralizations has been finalized with the elaboration of a basic cartography. In this action SIEMCALSA carried out a geological synthesis and as a task linked to this action, a map of variants was made.

The University of Porto, a partner in the project, hosted the third ESMIMET project follow-up meeting in its facilities at the Faculty of Sciences (FCUP). The partners shared the status of the tasks carried out in the activities so far.

The ESMIMET project researchers participated on June 12 and 13 with the presentation of a poster in the congress 'Sustainable Development of the Western Tethyan Metallogenic Resources', in Skopje (Republic of Macedonia). The main advances achieved so far in the project in this international reference event were presented.

Representatives of the ESMIMET project participate in the "Round table mining. European projects Good practices. Plan of actions "in the facilities of the Business Solutions Center of the Junta de Castilla y León (ICE). This day is the continuation of the INTERREG EUROPE REMIX project meeting, held on December 22, 2017.

Coming Soon....

The ESMIMET project will continue with its tasks: physical-chemical studies, development of R + D + i activities, project disclosure, etc.
