Study and assessment of mining Potential

www.esmimet.eu

So far....

During these months, the inventory of existing mineralizations in the field of work development and the characterization and sampling of known deposits has been carried out, carrying out structural and lithological controls

Researchers from CARTIF representing the ESMIMET project attend the meeting organized by the Remix project: Smart and Green Mining Regions of the European Union, which took place in the Business Solutions Center of Arroyo de la Encomienda (Valladolid). The objective of the day was the presentation of the European Raw Material Framework, Mining policy, funding opportunities for projects, networking structures, etc.

Within the framework of the thematic network generated in the project, members of the partnership, have participated in the SECOND CALL for the Interreg VA Spain-Portugal cooperation program through the "ESMILEN" proposal, taking advantage of the funding opportunities of this call, in related topics with mining.

Coming Soon....

We continue with the search of collaborators to belong to the regional work network in metallic mining technologies.
