# Until now...

Technicians from the Mining and Research Society of Castilla y León (SIEMCALSA) have attended the XVIII International Congress of Geological and Mining Heritage organized by the SEDPGYM (Spanish Society for the Defense of Geological and Mining Heritage) within the dissemination activities of the ESMIMET project.

In this last quarter of 2019, the partners of the ESMIMET project have met on Wednesday October 9 at the CARTIF Technology Centre (Boecillo Technology Park) to hold its fourth follow-up meeting since it was launched in July 2017.

On October 8, 2019, technicians from the Mining and Research Society of Castilla y León, SIEMCALSA, attended as speakers at the conference 'Opportunities of the Circular Economy in Industry. A look at raw materials'.

On October 10, a meeting of the ESMIMET project took place at the SIEMCALSA facilities and had the participation of technicians from the University of Porto (FCUP), SIEMCALSA and the CARTIF Technology Centre -as coordinator-, all members of the project. This meeting aimed to define strategies for the elaboration of the Metalogenetic Map.

Researchers from SIEMCALSA, a member of the ESMIMET project, have participated in the third edition of the 'Mining and Minerals Hall' held in Seville between October 15 and 17, 2019. This event is one of the European exponents in the sector of mining and has had the participation of more than 10,000 visitors, 130 exhibiting companies or 70 scientific speakers.

# Coming soon...

In 2020, the planned technical and dissemination tasks, as well as project management meetings, will continue.
